

A N A V A

VINEYARDS

*Anava Newsletter
September 2023*

Hello again,

It has been a busy summer for us, very hot (the Israeli sun can be unforgiving) but very exciting. This is because we have been planting the grape varieties in our innovative vineyard, which is totally unique in Israel. We also laid down the most advanced irrigation system, an Israeli invention adopted by the world.

Grown by Hand for Handcrafted Wines

Our vines are not orphans planted by busy parents, but individual children cared for by the best in the business. The professional team at Anava Vineyards includes Avinoam Inbar, one of the leading and most experienced agronomists and viticulturists in Israel, and Eyal Drory, one of the most talented young winemakers on the Israeli wine scene. Each small plot or

parcel, is grown individually with TLC (tender loving care) with the objective of making a wine which reflects the terroir and the wishes of the individual owner. Let's be quite clear: we are growing wine, not grapes.

Grape Varieties to Match the Terroir

We believe in planting the most suitable variety for the terroir. We focused on red Bordeaux varieties, Cabernet Sauvignon, Merlot, Petit Verdot, Cabernet Franc and Malbec, along with a Mediterranean varieties Shiraz and Petite Sirah; and white varieties Sauvignon Blanc, Chardonnay and Chenin Blanc.

Providing Options

This mix gives the individual owner the flexibility to make their own decisions. Maybe they want to make a varietal (from one variety only), a Bordeaux style blend or an intriguing Bordeaux – Mediterranean blend. The page is blank and the opportunities are enormous. Our owners will sit with our professional team and instantly all will become clearer. The dream of growing you own wine will become a vision with a practical action plan.

*We wish you all a Shana Tova,
a Sweet and Happy New Year
of good wines with
beautiful wine dreams coming true!*

**Yours,
The Anava Team**
